JUPITER 25 BAY

POWERED BY  **YAMAHA**

There's never been a Bay Boat quite like the Jupiter 25 BAY. Combining the features of a traditional bay boat with those of a larger offshore center console, we created a versatile hybrid. A 15" draft provides superb shallow water performance, while higher gunnels, flush decks and large tournament live wells provide the functionality of larger offshore sportfishers. With a stable ride, outstanding range and top speed of over 50 mph you'll be ready to launch into your next adventure in style.
